Description
Thermafiber® Safing products are designed to provide life saving fire protection in perimeter fire containment systems, floor and wall penetrations, construction joints, and other firestopping applications. These products are noncombustible, moisture-resistant, noncorrosive, nondeteriorating, mildew-proof and vermin-proof. Thermafiber Safing provides thermal insulation, fire protection, and acoustical control in many different UL and Intertek (formerly OPL) listed fire containment assemblies of 1, 2, and 3-hr ratings.

- Exceptional performance in Perimeter Fire Containment Systems
- Provides life saving fire protection in rated assemblies
- Fire resistant to temperatures above 2,000°F (1,093°C)
- Easy to fabricate for through penetrations and firestopping
- Conserves energy, reduces greenhouse gas emissions
- Resists moisture
- Controls noise and sound

Product Options
- Safing 4.0 pcf, 2" or greater thickness, is available with or without a vapor retarding foil facing.
- Safing 6.0 pcf, 1.5" or greater thickness, is available with or without a vapor retarding foil facing.
- Recycled Content Options:
  Standard Fiber (Compiles with EPA Preference Program)............Minimum 75%

Installation
All firestopping insulation should be installed per the architectural wall sections CC-CM-02 and CC-CM-05 at www.CavityComplete.com.

- Penetration Application: Safing insulation should be cut slightly larger than the opening and compression fitted into the opening, leaving no voids.
- Construction Joint Application: Safing insulation should be compression fitted into the joint opening, leaving no voids.

Standard Sizes

*Thicknesses are available in 1/2 in. increments.
**Custom sizes are available upon request.

Thermafiber® Safing and FireSpan® insulation provide the critical components of the perimeter fire containment system in the 111 South Wacker Building in Chicago, IL. Thermafiber insulation also contributed to the building’s LEED® Gold Rating.

**R** = thickness divided by ‘k’

### Fire-Containment Tests Per ASTM E 2307

Safing insulation is a critical component of any perimeter fire containment system. Thermafiber® has performed decades of testing in all of the following containment systems:

- Aluminum Spandrel Curtain Wall Fire Containment
- Steel Stud-Framed/Gypsum Sheathing Curtain Wall Fire Containment
- Glass Spandrel Curtain Wall Fire Containment
- Granite Spandrel Curtain Wall Fire Containment
- Precast Concrete Spandrel

For more complete test information, see SA707, Thermafiber Life-Safety Fire Containment Systems technical catalog or UL® and Intertek® (formerly OPL) Directories. For a full listing of containment systems visit www.thermafiber.com and click on Fire Rated Assemblies. UL Reference = TYPE SAF

### Standards Compliance

Safing Insulation meets the following:

- ASTM C 665  Non-corrosive, Type I, III
- ASTM C 612  Type IA, IB, II
- ASTM E 136  Rated Non-combustible per NFPA Standard 220
- ASTM E 96  Unfaced, 50 Perms as tested
- ASTM E 96  Foil Faced, 0.02 Perms as tested
- ASTM C 1104  Absorbs less than 1% by volume
- ASTM E 814  Safing Insulation used in conjunction with an approved fill, void, or cavity material sealant or other approved material in through – penetration firestop systems.

or UL 1479

Thermafiber® Insulations®

Thermafiber® offers industry leading technical and engineering assistance to architects, specifiers, and contractors. These services include CAD drawings, engineering judgments, LEED® Credit Information, product recommendations, and customized products.

### For Further Information

For additional information about Thermafiber® Safing Insulation contact us at 844-CAV-COMP or visit www.CavityComplete.com.

### Notice

Thermafiber, Inc. shall not be liable for incidental and consequential damages, directly or indirectly sustained, nor for any loss caused by application of these goods not in accordance with current printed instructions or for other than the intended use. Thermafiber liability is expressly limited to replacement of defective goods. Any claim shall be deemed waived unless made in writing within thirty (30) days from date it was or reasonably should have been discovered.
