FINISHING SYSTEM™

The Purpose-Built Basement Solution™

Basement Finishing System™
Core

It's Not Just A Basement

After all, you bought a whole house: Isn't it time you lived in one? We are excited that you want to make an investment in the quality of your life. The Owens Corning® Basement Finishing System™ is a great choice for convenience, adaptability, and ease of use.

A New Space That Fits Your Needs

An unfinished basement is a clean slate. Your basement can be transformed into the room of your dreams – virtually anything that you desire. Finishing your basement is not only a good investment, but thermally insulating the walls to reduce heat loss could lead to savings on your heating bills*.

*Savings vary. Higher R-values mean greater insulating power.

Owens Corning Revolutionized Basement Finishing

After all, Owens Corning invented fiberglass insulation. The Owens Corning® Basement Finishing System™ is the result of extensive research and testing. It is a product designed specifically to meet the unique needs of the basement environment. Owens Corning utilized its expertise to create insulated walls that breathe, won't trap moisture and are mold and mildew resistant*.

A Smart Way to Add Living Space

Basements are typically one of the most under-utilized part of homes for living space. Finishing your basement expands your home – adding features and real value. The Owens Corning Basement Finishing System offers a fast and easy way to get the extra living space you need. And it's different because, unlike drywall, the Basement Finishing System was designed specifically for the basement.

Room to Enjoy Now with Adaptability for the Future

Owens Corning has taken into account that you would probably like to use your new living space now and in the future. Life in your newly installed room may entail running computer wires, cables and phone lines, all of which are concealed. The system is designed to allow access to the foundation and wiring whenever necessary.

Your New Room Will Look New for Years to Come

With the Owens Corning Basement Finishing System, walls resist denting or staining and never have to be painted or papered. The insulated walls also make your basement feel warm and cozy. You'll never think of it as a "basement" again.

After

Before

Designed to Resist Mold and Mildew*

Basements naturally have more moisture than the rest of your home. Plus, there is the added possibility of leaks from outside or from plumbing. Using drywall or other traditional methods, if moisture is present, can increase the likelihood of mold and mildew* developing. Our materials are breathable and inorganic to mold and mildew*. When moisture is present, the walls actually “breathe” and allow it to pass through and dissipate in the air instead of trapping it, absorbing it, or both.

Pub. No. 100577-B. Printed in U.S.A. September 2016. *While the materials and design of the Owens Corning® Basement Finishing System™ resist mold and mildew, the System cannot prevent or mitigate mold if the conditions necessary for mold growth otherwise exist in your basement.
