

## The essentials for a healthy roofing system.

It takes more than just shingles to create a high-performance roof. It requires a system of products working together. Owens Corning™ Roofing Essentials® Accessory Products work with our shingles to make up a roofing system that helps provide maximum durability for your roof. And the most protection for your home.

- a** **VentSure® Ventilation Products.** Help protect a roof from premature failure by helping remove heat and moisture from the attic. 
- b** **PINK® Fiberglas™ Blown-In Insulation.** Tiny air pockets trapped in the insulation resist the passage of heat flow.
- c** **Owens Corning™ Hip & Ridge Shingles.** Help protect the ridge vent and add an attractive, finished look to a roof's hips and ridges.
- d** **Owens Corning™ Shingles.** Add durable beauty to a home. Shingles are the first line of defense against the elements.
- e** **Owens Corning™ Underlayment Products.** Add an extra layer of protection between the shingles and the roof deck to help prevent damage from wind-driven rain.
- f** **WeatherLock® Self-Sealing Ice & Water Barrier Products.** Help guard vulnerable areas where water can do the most damage to a roof: eaves, valleys, dormers and skylights.
- g** **Owens Corning™ Starter Shingle Products.** The first step in the proper installation of shingles.
- h** **Owens Corning™ Undereave Ventilation Products.** Help prevent moisture buildup in the attic by working with ridge vents to keep air moving.

# There's more to a peak-performing roof than meets the eye.

Choosing a new roof is one of the most important purchase decisions you can make. And it takes more than just shingles. You need a complete system. Owens Corning™ Roofing Essentials® Accessory Products work together to help prevent premature aging, cracked shingles and structural damage. The result is a roof that will look and perform its best for years to come.

## Engineered to work together

Even the highest quality shingles cannot work alone to protect your home. Instead, a roof comprises many components. Owens Corning™ Roofing Essentials® Accessory Products are designed to work as a system to maximize performance and durability. The products featured in this brochure address some of the most important issues to consider when installing a new roof. These include ensuring a healthy airflow at the roof's peak, providing extra protection from the elements around vulnerable areas, and reducing routine maintenance.

You can rely on Owens Corning and your roofing contractor to make it easy for you to get the complete roofing system you want and need.

## Release heat and moisture. Increase roof durability.

### VentSure® Ventilation Products

Work together with undereave vents to allow the natural flow of outside air up into the attic—and back out again. This helps prevent excessive heat and moisture from accumulating in the attic and leading to premature roof failure.

Attic moisture can cause:

- Wet wood—sagging roof deck
- Potential insect infestation
- Mold, spores, fungi and mildew
- Interior damage

Attic heat can cause:

- Ice dams that prevent water runoff
- Premature failure of roofing materials

Proper insulation and ventilation minimizes the temperature differential between the attic and the air outside, helping to reduce energy costs.

## Add protection against moisture and block water damage.

### Deck Defense® High Performance Roof Underlayment

- Offers long-term moisture protection for your roof compared to standard felt underlayment
- Acts as a non-absorbent, secondary water-shedding barrier
- Reduces water intrusion when exposed, which could lead to mold and premature roof failure
- Reduces the chance for tears that cause leaks due to unique bottom surface coating compared to felt underlayment

## Protect your roof from wind-driven rain and ice damming.

### WeatherLock® Self-Sealing Ice & Water Barrier Products

- Work below the surface to help guard vulnerable areas where water and ice dams can do the most damage to a roof: eaves, valleys, dormers and skylights
- Especially important for use in areas that experience extreme weather

## It takes more than shingles to create a high-performance roof.

### Starter Strip Shingles

- Protects your roof by filling in the spaces under the edges.
- Helps keep water from getting through to the deck between any gaps in the first course of shingles
- Helps to ensure an even application.
- Properly positioned, factory-applied adhesive that will lock your shingles in place to help prevent blow-off along the eave of your roof.
