

Total Protection Roofing System[®]^

Three Ways to Total Protection

It takes more than just shingles to protect a home. It takes an integrated system of components and layers designed to perform in three critical areas. The Owens Corning[®] Total Protection Roofing System[®]^ gives you the assurance that all of your Owens Corning[®] roofing components are working together to help increase the performance of your roof.

SEAL.

HELPS CREATE A WATER-PROOF BARRIER

Ice & Water Barrier
Underlayment

DEFEND.

HELPS PROTECT AGAINST NATURE'S ELEMENTS

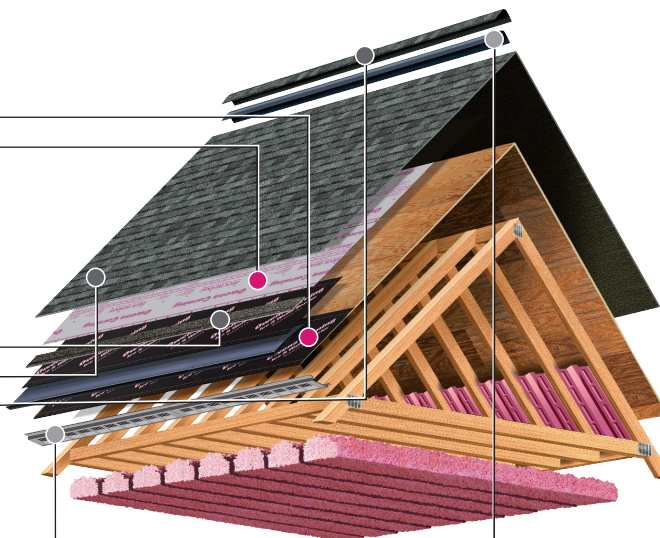

Starter Shingles
Shingles
Hip & Ridge Shingles

BREATHE.

FOR BALANCED ATTIC VENTILATION

Intake Vents
Exhaust Vents

SEAL.

Ice & Water Barrier

Help protect vulnerable areas where water can do the most damage: eaves, valleys, dormers and skylights.

Underlayment

Help prevent damage from wind-driven rain by providing an additional layer of protection between the shingles and roof deck.

DEFEND.

Starter Shingle

Creates a secure seal of protection on the first row of shingles, along the eaves, defending against blow offs.

Shingles

Choose from a variety of durable styles and colors that provide the first line of defense against the elements.

Hip & Ridge Shingles

Help protect the ridge vent and add an attractive, finished look to your entire roof.

BREATHE.

Intake vents

Help prevent heat and moisture buildup in the attic by allowing fresh air to enter the attic.

Exhaust Vents

Help protect your roofing system by allowing heat and moisture to escape from the attic.

[^]Excludes non-Owens Corning[®] roofing products such as flashing, fasteners and wood decking.
