

INNOVATIONS FOR LIVING™

VINYL SIDING PRODUCTS

HELPING YOU ACHIEVE LEED CERTIFICATION

Owens Corning vinyl siding products protect from the elements and severe weather for residential buildings. As you pursue LEED Certification, rely on the products and expertise of Owens Corning.

LEED certification points are based on the overall building design concept and performance. Owens Corning vinyl siding products assist in attaining points for the categories listed in Table I. All components referring to a given category must be taken into consideration to assess point compliance.

Owens Corning Vinyl Siding Products

- Owens Corning®
- NORANDEX®/REYNOLDS®
- HomeSide®
- BUILDER'S PRIDE®
- Vytex®
- Accord®
- OAKVIEW®
- Walnut
- TOWN HALL®
- GENERATIONS™
- AMERICAN CLASSIC®

Table I

Contribution to LEED Requirement

LEED Credit Category	LEED Requirement	Vinyl Siding Contribution	Additional Comments
Material & Resource— Local/Regional Materials	1-2 points dependent on 20% of all materials manufactured regionally within 500 mile radius of project.	3 U.S. and 1 Canadian manufacturing plant help provide contribution to category points.	Check with local sales representative, and refer to Fig. I, to determine raw and finish material place of origin.

Note: No individual material enables a credit point to be taken within LEED because each category is dependent on the aggregate of all materials and their proportionate relationship to the total dollar cost of all materials.

Local And Regional Materials

Owens Corning vinyl siding plant locations are shown on Fig I. Plotted on the map are approximate 500-mile radii, 1000-mile diameter circles, for each plant. The map enables estimation of building projects that are eligible for the LEED credit regarding regional materials and regionally extracted raw materials. Regional materials are those produced within 500 miles of a building project where the materials will be installed.
