Limited Warranty

Owens Corning warrants to the original consumer purchaser ("Consumer") that its roofing shingles ("Shingles") are free from manufacturing defects that affect shingle performance. This Warranty Period commences upon completion of the Shingle application and expires at the end of the Warranty Period applicable to the type of Shingles installed.

Transfersability of the Warranty

This Warranty is not transferable.

Remedy

Should the Shingles be otherwise than as warranted during the Warranty Period, Owens Corning will pay to the Consumer the pro-rated reasonable cost of repair or replacement of the Shingles, up to these limits:

- Maximum repair or replacement cost to Owens Corning shall be the replacement cost of the defective Shingles, including labor (exclusive of metalwork, flashing or other related work), if the Shingles have been installed for less than twelve months. If the Shingles have been installed for twelve months or more, the reasonable replacement cost will be reduced by a percentage which is based on the number of months elapsed in the Warranty Period divided by the original Warranty Period. In all cases, the extent of repair or replacement required and the reasonable cost of such repair or replacement will be at the sole discretion of Owens Corning. Owens Corning will not pay the costs to tear-off or dispose of your Shingles.

- A monetary settlement as described above will be the only remedy available to the Consumer for defective Shingles.

Wind Resistance

20- and 30-year warranted Shingles classified as "Wind Resistant" shall be resistant to wind damage, after thermal sealing has taken place, at wind velocities up to 60 miles per hour only during the first five years. After installation, 20- and 30-year warranted Shingles classified as "Wind Resistant" shall be resistant to wind damage, after thermal sealing has taken place, at wind velocities up to 60 miles per hour only during the first five years after installation.

All Shingles containing a strip of thermal sealing assembly must be subjected to wind tests. As long as the Shingles seal after thermal sealing is taken place, the Shingles should remain in the same condition. Shingles installed in the rain or snow may not seal until the following spring. Shingles which do not receive direct sunlight or which are not exposed to wide temperature variations may never seal. This is the nature of shingles and failure to seal under such circumstances is not a manufacturing defect.

In cases where Owens Corning determines that thermal sealing should have occurred and did not due to a manufacturing defect, Owens Corning will be liable only for the reasonable cost of replacing blown off Shingles and the reasonable cost of manually sealing the unsheathed Shingles remaining on the roof.

Limitations on Coverage

This Warranty does not apply to and Owens Corning shall not be liable for:

- Failure of any product used on the roof except those expressly covered by this Warranty and manufactured by Owens Corning.
- Damage to the Shingles due to causes beyond normal use and service including, but not limited to:
  - Acts of God, including without limitation, hail storms.
  - Wind velocities greater than 60 miles per hour on 20- and 30-year warranted Shingles; and wind velocities greater than 80 miles per hour on 30- and 40-year warranted Shingles.
  - Traffic on the roof or impact of falling objects.
  - Improper storage or misuse of the Shingles.
- Damage to the Shingles caused by inadequate ventilation or roof drainage. Minimum ventilation requirements are one square foot net free ventilating area per 150 square feet of space ventilated. For clarification or further information, contact Owens Corning at 1-800-ROOFING.
- Damage to the Shingles caused by alterations made after completion of application, including, but not limited to, structural changes, equipment installation, painting, or the application of cleaning solutions, coatings, or other modifications.
- Damage to the Shingles caused by settlement of the building, buckling of the roof deck, walls, or foundation.
- Variations in the color of the Shingles which may occur from the natural positioning of the granular surfacing material.
- Any cost incurred for repair or replacement not authorized by writing from Owens Corning.
- Damage to the Shingles due to any cause other than manufacturing defects in the Shingles manufactured by Owens Corning.
- Damage to the Shingles due to improper fastening of the Shingles, faulty application or application not in strict accordance with Owens Corning's printed application instructions.
- Damage to the Shingles due to defects in, or failure or misapplication of materials used as a roofing base over which the Shingles were applied.
- Discoloration caused by algae, fungi, lichens or cyanobacteria.

Any implied Warranty, including Warranty of Fitness for a Particular Use or Purpose, and Warranty of Merchantability, is LIMITED IN DURATION TO THE WARRANTY PROVIDED HEREIN. UNLESS A SHORTER PERIOD IS PERMITTED BY LAW, OWENS CORNING SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OR FOR DOOR TO THE BUILDING, ITS CONTENTS OR ITS OCCUPANTS. THIS WARRANTY CONTAINS ALL THE PROVISIONS OF YOUR REMEDIES FROM OWENS CORNING. OWENS CORNING'S LIABILITY IS LIMITED TO THE PROVISIONS OF THIS WARRANTY, WHETHER ANY CLAIM AGAINST IT IS BASED UPON STRICT LIABILITY, NEGLIGENCE, BREACH OF WARRANTY OR ANY OTHER THEORY OR CAUSE OF ACTION.

Some states do not allow limitations on how long an implied warranty lasts or the exclusion of incidental or consequential damages, so the above limitations may not apply to you.
