

PROCAT[®]
PROFESSIONAL

LOOSEFILL INSULATION SYSTEM

LOOKING FOR A WAY TO GROW BUSINESS? LOOK IN THE ATTIC

Help grow your business with the ProCat[®] Professional Loosefill Insulation System. You're already in the customer's home for your HVAC business, so it makes sense to provide an insulation assessment along with your indoor air-handling analysis. Re-insulation is a great opportunity to grow your business because, today, approximately 90% of existing U.S. single-family homes are under-insulated,¹ meaning most of your existing jobs have untapped potential.

ONLY THE BEST FOR PROFESSIONALS.

The ProCat® Professional Loosefill Insulation System provides the following benefits:

- Fast — One bag covers 80.6 ft. @ R-30 in as little as four minutes
- Simple — Machine is easy to transport and maneuver
- Clean — Low dust and static formula
- Controllable — Button to install high-density insulation for great performance at the attic eaves with reduced blow-back
 - Makes installations easy, accurate, and safe
 - Dials in the wall R-value through one 2"–3" hole

Insulation + ventilation + air sealing helps keep excessive moisture and heat out = proper conditions and temperatures throughout the year.

Set yourself apart from the competition

Be the Energy Expert

It's not all about what you see — you need to bring the insulation in the home up-to-date, too. You're in an excellent position to differentiate yourself from your competitors. It's as simple as letting your customers know you can re-insulate the attic at the same time you do HVAC work. With the ProCat® System, your customers will experience superior thermal performance — making their homes more comfortable, quieter places. The ProCat® Professional Loosefill Insulation System helps grow your business, while providing you marketable benefits.

Cash in on a profitable opportunity

Are you missing out on a valuable opportunity to grow your business?

Heating, ventilation, and air conditioning (HVAC) systems work hand-in-hand with well-insulated attics to keep your customers' living space comfortable. Properly installed insulation allows for their system to perform in extreme temperatures, resulting in greater energy efficiency for your customers and, ultimately, more sales for you.

Machine Features

- Professional design
 - Durable exterior
 - Water-resistant remote
- Heavy-duty motor, agitators, gears, and controls
- Generator friendly
- Smart technology
 - Push-button wall density
 - Precision-controlled-density
 - Remote-controlled dense mode
