

INTRODUCING OWENS CORNING® THERMAFIBER® RAINBARRIER® DARK™ CONTINUOUS INSULATION DESIGNED TO BLEND IN

Innovative open-joint assemblies and new cladding materials let you create eye-catching façades. Continuous insulation (ci) helps you achieve your building's performance goals. The new Thermafiber® RainBarrier® Dark™ ci brings both of these goals together, so you don't have to choose between form and function.

With a fiberglass dark veil facing, Thermafiber® RainBarrier® Dark™ ci complements your design — instead of competing with it — while providing all the performance benefits your project requires.

Aesthetics Meets Performance

Thermafiber® RainBarrier® Dark™ performs just the same as the Thermafiber® RainBarrier® ci you know and trust but incorporates a black facing that blends into the background of open-joint and rainscreen designs. The types of fastener, method, and frequency are to be determined by the installer for the specificity of the project and approved by the project design team.

Benefits

NEW! Dark Veil

Provides camouflaging behind open-joint facade systems and eliminates need for additional field-installed facing.

Moisture Resistance

Engineered to repel and drain water.

Non-Combustible

Mineral wool is non-combustible as tested to ASTM E136.

UV Resistant

Color fastness of black veil tested per ASTM D2244.

Durability

Dark facing maintains integrity post-installation.

Thermal Comfort

Contributes to energy efficiency with R-values that won't decrease as the insulation ages.

Installation

Easy to install in multiple façade configurations. Works with masonry ties, girts, and clip and rail systems.*

Available in two options

- **RainBarrier® Dark™ 45**
Preferred for most semi-rigid applications and ideal when used in conjunction with thermally isolated standoff systems.
- **RainBarrier® Dark™ HD**
High density providing additional thermal performance, and ideal when used in conjunction with thermally isolated standoff systems.
