

# THERMAFIBER®
# FIRE & SOUND GUARD® PLUS
# THERMAL AND FIRE BATT

Thermafiber® Fire & Sound Guard® Plus mineral wool insulation batts are a versatile, multi-purpose insulation solution for residential and light commercial construction. Designed to deliver a balanced combination of thermal performance, fire resistance, sound control, and moisture resistance, it provides dependable all-around performance across a wide range of applications while simplifying product selection and installation.

## Thermal Comfort

Contributes to energy efficiency with R-values that won't decrease as the insulation ages[1]

**Non-Combustible**
Mineral wool is non-combustible per ASTM E119

**Fire Resistant**
Mineral wool is naturally fire resistant and helps reduce the risk of fire spread per ASTM E136

**Sound Control**
Helps control noise between floors, through walls, and from outdoors

**Mold Resistant**
Resists mold, fungi, and is vermin-resistant per ASTM C1338

**Recycled Content**
Minimum 70% recycled content[2]

**Ease of Installation**
Batt product that is easy to cut and install, flexibility and durability allow it to conform and friction fit

### Availability

Available in a wide range of R-values for common wood stud assemblies as well as steel framing in both narrow and wide widths.

- **Wood Stud R-Values**
  R-11, R-13, R-15, R-21, R-23, R-30
- **Steel Stud R-Values**
  R-10, R-11, R-13, R-15, R-21, R-24

### Applications

- Interior and exterior cavity walls
- Ceilings
- Basement walls
- Crawl spaces
