

HELP MAKE YOUR HOME COMFORTABLE AND QUIET WHILE LOWERING YOUR HEATING AND COOLING BILLS.*

**DID YOU
KNOW?** MORE THAN
90%
OF U.S. HOMES ARE
UNDER-INSULATED!¹

You may be paying higher energy bills than you should be. Ensure that your home is energy efficient by adding attic insulation and sealing air leaks.

The Solution

- Advanced formula supports a comfortable, quiet, and healthy home
- Helps create an energy-efficient home
- Virtually no settling for thermal performance
- Limited lifetime warranty²

Professional Insulation System

Owens Corning® ProCat® attic insulation is an essential part of your home comfort. A properly sealed duct system and insulated attic help maximize the efficiency of your HVAC system.

*Savings can vary.

Help Protect Your HVAC Investment

It takes a complete system — including a properly insulated attic and sealed duct system — to maximize HVAC system performance.

With a properly insulated and sealed home, you'll be able to manage and mitigate excess heat and humidity more effectively and help extend the life of your HVAC system.

- Helps prevent hot or cold spots in your home by preventing conditioned air from escaping into the attic.
- Reduces energy loss so that your HVAC system doesn't have to work harder than it needs to.
- ProCat® Professional Loosefill Insulation is guaranteed to maintain its insulating power for the lifetime of the home.
- ProCat® Professional Loosefill Insulation System helps you save money, while also extending the life of your home.
- Non-corrosive, low-dust formula.
- Increased noise control.

Wellness and Safety

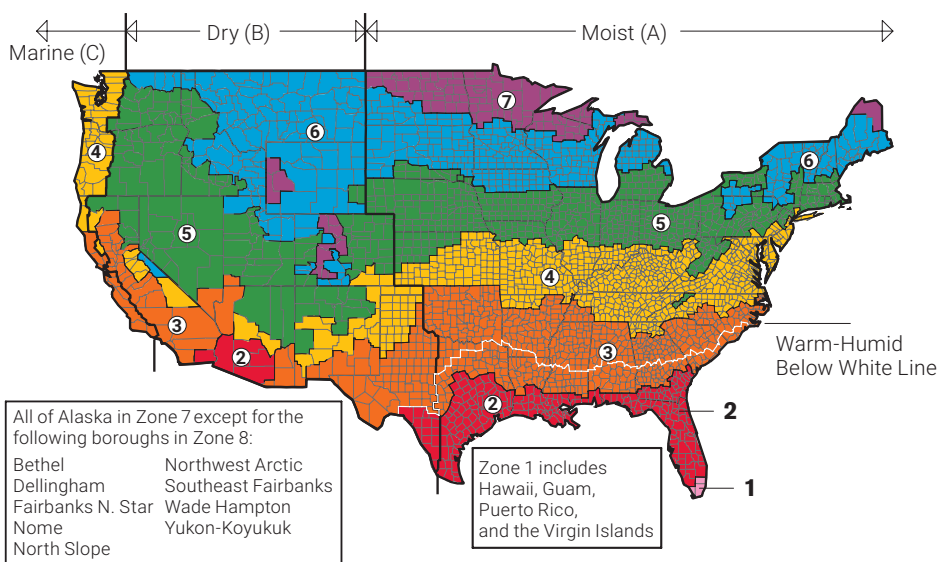

The Owens Corning® ProCat® System provides the following benefits:

- ProCat® Professional Loosefill Insulation will not absorb moisture; it is not a nutrient source for mold and fungi or a food source for pests.
- ProCat® Professional Loosefill Insulation is GREENGUARD Gold certified.
- ProCat® Professional Loosefill Insulation meets code requirements for a Class A fire rating, flame spread 0, and smoke developed 0, when tested per ASTM E84/UL-723.
- Validated to be formaldehyde-free.

Does Your Home Measure Up?

The U.S. Department of Energy recommended R-values for adding insulation to an attic. Depending on where you live, you may need up to 20 inches of attic insulation.

| | |
|---------|-------------------|
| Zone 1: | R-30 to 49 |
| Zone 2: | R-30 to 60 |
| Zone 3: | R-30 to 60 |
| Zone 4: | R-38 to 60 |
| Zone 5: | R-49 to 60 |
| Zone 6: | R-49 to 60 |
| Zone 7: | R-49 to 60 |

The new Department of Energy map recommends a range of R-values up to R-60. The previous recommendation for most zones was up to R-49.
