

NATURAL THERM™

Spray Foam Insulation

ADVANCED INNOVATIONS FOR MORE APPLICATIONS

Spending time unclogging equipment and dialing in a better mix can cost installers and builders money.

Natural Therm™ spray foam insulation is GREENGUARD certified and designed to deliver optimal sprayability with dependable yields. Whether using them alone or in combination with other insulation products, there's a high performance Natural Therm™ spray foam insulation that's right for nearly any application across the home.

OPEN CELL

- High-yielding, low-density foam insulation to protect against air infiltration
- Expands to fit irregular or hard-to-reach spaces
- Meets California air quality standard CA 01350

CLOSED CELL

- Our strongest structural spray foam with a wide processing window
- Highest R-value per inch
- Meets the California air quality standard CA 01350

ZERO CELL

- High-density structural spray foam for an optimal balance of stiffness and yield
- Hydrophobic structure
- Higher R-value compared to open cell

MORE SOLUTIONS HIGH STANDARDS

Natural Polymers products give discerning builders and insulation contractors a solution they can feel confident about using and recommending for applications where spray foam is the right choice. Featuring innovative chemistry and a low-VOC product, Natural Polymers spray foam products align with Owens Corning's rigorous standards for performance, safety and environmental impact.

Why Choose Natural Polymers?

CONSTANT INNOVATION

Exclusive formulations that are easy on equipment and delivers exceptional sprayability

FOUNDED ON EXPERTISE

Founded by a contractor and chemist who knows the needs of discerning builders and installers

LEADING TECHNICAL SUPPORT

Personalized and efficient on-the-job customer support when you need it

BIO-BASED FORMULATIONS

UL Bio-Based formulations for high performance spray foam insulation
