

NATURAL
POLYMERS™

INTRODUCING

**NATURAL-THERM®
MARINE SPRAY**

&

**NATURAL-THERM®
MARINE POUR**

Designed for marine applications that meet depth and buoyancy requirements while providing rigidity and strength. These products exceed industry standards for resisting pressure and water penetration and can be applied by pour-in-place or spray method.

Features

- Excellent processing characteristics
- Consistent density distribution for proper flotation
- Certified for flotation applications¹

Applications

- Buoys
- Boats, ships
- Docks
- Set design
- Water features
- Molding
- Floating devices

¹ Code of Federal Regulations 33 Section 183.114
"Test of Flotation Materials."
