

SUSTAINA[®] LOOP DESIGNED FOR CIRCULARITY

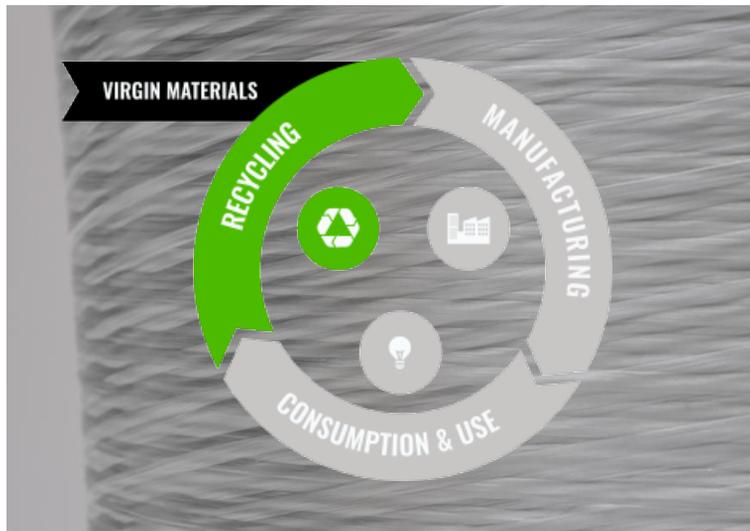

SUSTAINA Loop is a glass technology designed for circularity, offering the same performance and properties as ADVANTEX[®] E-CR Glass – **it's your plug-and-play solution to help advance the circular economy.**

Advance the Circular Economy

OC products made with SUSTAINA Loop have up to 100% circular glass fiber, collected from your own waste or other reliable composites industry sources².

[Send us your Glass Fiber Waste³](#)

²Glass Fibers made with E-CR Glass only.

- Made with up to 100% circular glass fiber and ¹100% renewable electricity
- Designed to make the Type 30[®] Single-End Roving products you already know and trust
- Mass Balance ISCC+ certified

¹Depending on the source. Currently available in l'Ardoise, France.

The Mass Balance Approach

Each product made with SUSTAINA Loop combines virgin materials with circular glass fiber content. Our Mass Balance approach ensures we can track and verify the circular content your company purchases.

Availability and Compatibility

Just like ADVANTEX Glass, SUSTAINA Loop can be used to manufacture any Type 30[®] Single-End Roving products, such as PULSTRAND[®] 4100 and SE1200, maintaining the same performance and properties. **It's your plug-and-play solution to help advance the circular economy.**

SUSTAINA Loop is currently produced in l'Ardoise, France.
