

EZSHEATH™

STRUCTURAL INSULATED SHEATHING

Helping Builders Save Costs and Meet New Codes

EZSHEATH™ Structural Insulated Sheathing is a composite structural insulated sheathing panel designed for use as exterior sheathing in residential wood-framed walls.

Made with FOAMULAR® NGX® Extruded Polystyrene (XPS) — a closed-cell, moisture-resistant rigid foam board. The additional polymer layers result in a product that is structural, a nail base, lightweight, and durable on and off the job site.

Benefits

- **Faster Installs, Fewer Steps:** EZSHEATH™ combines structure, continuous insulation, and air/water protection in one panel — streamlining the building envelope and reducing installation time.
- **Labor & Cost Efficiency:** EZSHEATH™ is easier to handle, requires no house wrap, and installs with standard tools — helping crews work smarter and cutting overall labor costs.
- **Strength You Can Trust:** Holds nails tight — even through extreme temperature swings and humidity — and maintains racking strength up to 3" thickness, delivering durability without compromise.
- **Energy & Code Confidence:** Built with FOAMULAR® NGX® XPS insulation for dependable R-5 per inch minimum even in cold temperatures and over time, EZSHEATH™ helps meet tomorrow's codes today while improving energy efficiency.
- **Job Site Tough:** Inorganic materials and a polycarbonate facing, EZSHEATH™ holds nails better than OSB even in extreme temperatures and humidity.
- **4-in-1 System:** Provides structural reinforcement, continuous insulation at an R-5, and an air and water barrier (when used with EasySealR® and FlashSealR® Foam Joint Tape) in a single panel to meet residential building code requirements.
- **50% Lighter than OSB:** Significantly lighter than traditional OSB, reducing physical strain on crews and allowing for easier handling and installation.

- **Water-Resistant:** Made with closed-cell extruded polystyrene foam insulation known for its moisture resistance.
- **Limited Warranty:** EZSHEATH™ Structural Insulated Sheathing has a 30-year warranty against manufacturing defects and is made with FOAMULAR® NGX® XPS insulation.
