The colour PINK is a registered trademark of Owens Corning. © 2026 Owens Corning. *Savings vary depending on original amount of insulation in your home, climate, house size, air leaks, and personal energy use and living habits. †Based on Stats Canada Census 2021 and 2016 Census and code analysis with respect to R-60 by independent industry expert, Keith Wilson, commissioned by Owens Corning June, 2022. ‡As manufactured, fiberglass insulation is resistant to mold growth (ASTM C1338-96 Fungi Resistance of Insulation Materials and Facings.) However, mold growth can occur on building materials, including insulation, when it becomes contaminated with organic material and when water is present. To avoid mold growth on fiberglass insulation, remove any water that has accumulated, and correct or repair the source of that water as soon as possible. Insulation that has become wet should be inspected for evidence of residual moisture and contamination, and any insulation that is contaminated should be promptly removed and replaced.

**TOP UP YOUR ATTIC
AND SAVE ON HEATING
AND COOLING COSTS.¹**

THERE ARE OVER 9 MILLION UNDER-INSULATED ATTICS IN CANADA.²

IT'S LIKELY YOUR ATTIC NEEDS TOPPING UP!

By topping up your attic insulation, you can save on your heating and cooling costs¹, and have consistent temperatures room to room for a more comfortable home.

Owens Corning recommends R-80 or 28.5" of blown insulation for your attic.

PROPINK® FIBERGLAS® Blown Loosefill Insulation is an alternative to batt insulation providing thermal performance in insulated attics. It can also be used in interior ceilings, floors and walls to reduce noise transfer in new construction or retrofit applications.

Only specially trained, professional contractors can install Owens Corning PROPINK® FIBERGLAS® Blown Insulation.

Benefits of hiring a contractor that installs PROPINK® FIBERGLAS® Blown Loosefill Insulation:

- Provides exceptional thermal protection
- Virtually no settling, preserving thermal performance over time
- Resistant to moisture, fungus, and mold-growth³
- Non-combustible, non-corrosive, and UL validated to be formaldehyde-free

PROPINK® FIBERGLAS® Insulation can be used in Attics as thermal insulation, and for interior walls, ceilings and floors to reduce noise transfer.

ALL THIS FROM A BRAND YOU KNOW AND TRUST.
