

ACCESSORIES PRODUCT APPLICATIONS

JointSealR® Joint Seal Tape: Foam joint tape for sealing ship lap or butt edge joints on FOAMULAR® NGX™ Extruded Polystyrene (XPS) Rigid Insulation. Sealing of joints allows XPS insulation to function as air and weather barrier. Thin and flexible to seal around penetrations and uneven surfaces, with aggressive adhesive for long-term adhesion, strength and handle-ability.

FlashSealR® Tape: Flashing tape that helps to provide effective protection against air infiltration and water penetration. Self-adhering without aid of primers and designed to be applicable in cold temperatures. For best adhesion, the tape should be applied over the foam sheathing at the time the sheathing is installed. Thin and flexible to seal around penetrations and uneven surfaces, with aggressive adhesive for long-term adhesion, strength and handle-ability.

Raft-R-Mate® Under Deck Attic Vent: Raft-R-Mate® attic vent is a rigid polystyrene sheet shaped to create a ventilation path/cavity between the insulation and the roof deck. Raft-R-Mate® attic vents help ensure that the insulation does not block the air flow path. Inadequate ventilation may lead to excess heat and moisture build-up in the attic or rafter cavity. These conditions can lead to the deterioration of the roofing materials and deck, insulation, structural framing members, or interior ceiling finishes.

QuietZone® Acoustic Floor Mat: Acoustically engineered to isolate sound vibrations and impact sounds within a flooring system. Designed to be placed between wood or concrete subfloor and a plywood, gypsum concrete, or concrete overlayment. Absorbs impact sound vibrations, retains acoustic properties over time and resistant to moisture, mold and fungus. Lightweight rolls are easy to cut and install.

ProPink ComfortSeal™ Sill Gasket: A polyethylene foam gasket which provides resilient sealing in new and retrofit construction. Provides seal against air leakage, moisture and insect intrusion at the juncture of the foundation wall and sill plate. Used as expansion joint material in poured concrete and concrete block slab and wall construction. Can also be used as a compressible air sealing gasket for the Owens Corning® CodeBord® exterior air barrier system.
